

ABOUT US

Heartleaf Consulting provides 'engineered' supply chain management and logistics solutions enabling our clients to grow and transform their supply chain network and businesses with confidence at every stage from initial ideas and design feasibility through to implementation and beyond.

The Heartleaf team of supply chain and logistics professionals bring extensive experience across a vast range of industries and sectors including manufacturing, warehousing and distribution, transportation, 3PL, retail, consumer product goods, food and beverage, hi-tech, healthcare and government.

Specializing in Supply Chain and Logistics Strategy, Facilities Planning and Design, Process and Performance Improvement, Execution Planning and Management.

Our work is implementation focused. We work closely with senior management and their project teams to achieve the best possible outcomes and meeting or exceeding project deliverables. We undertake projects that range from a few days to months and even years.

SOLUTIONS

We work with clients from strategic planning, initial concept and feasibility stages, to design, through to implementation, and transition.

We encourage you to view our services as they cover a broad area of focus to deliver end to end supply chain solutions. Whether you are faced with a capacity issue, a facility redesign, increasing costs, a complex distribution strategy, or require a third party assessment, we look forward to discussing with you on how we can be a valued partner in helping you transform your facilities and supply chain network to improve operations and gain a competitive advantage.

SUSTAINABLE BENEFITS

As the 'green agenda' has gained momentum over the years among organizations worldwide, some of the most obvious gains are often found right within the supply chain. Since supply chains drive the flow of materials into and out of businesses, analyzing supply chain practices allows companies to identify opportunities on innovation in everything from logistics to packaging to collaboration in product materials and design.

SUPPLY CHAIN AND LOGISTICS STRATEGY

FACILITIES PLANNING AND DESIGN

PROCESS & PERFORMANCE IMPROVEMENT

EXECUTION PLANNING AND MANAGEMENT

INTERIM MANAGEMENT

Heartleaf can provide interim supply chain & logistics management to fill critical gaps caused by:

- New business opportunities demanding a fast response
- Projects or change initiatives that require special expertise
- A merger or acquisition that creates unexpected demands
- Turnaround situations

Our interim executives hit the ground leading to produce the immediate results you need.

GROWTH

is never by mere chance; it is the result of collaboration and dedication towards positive change as supply chain networks become increasingly complex.

SUSTAINABILITY

makes good business sense; supply chain management, logistics, and 'engineered' solutions that benefit the natural and social environment while improving the financial bottom line.

PASSION

and drive; staying up to date with global trends and emerging technologies, researching and developing solutions that are aligned with the business strategy, culture & values of the organization.

SUPPLY CHAIN & LOGISTICS CONSULTANTS

GROWTH • SUSTAINABILITY • PASSION

COLLABORATION

Heartleaf Consulting, Inc. works with preferred partners to ensure high quality of professional supply chain and logistics consulting services. Collaboration is important and we are always expanding our knowledge and partner base to ensure sustainable and cost effective results.
